

EDUCATION:

M.Sc. Integrated Computer Science (Integrated, 5th Year), College of Engineering Guindy (CEG), Anna University | Expected Graduation: 2027

EXPERIENCE:

AI/ML ENGINEER INTERN – Invisibl Cloud (June 2025 - present)

- Working as an AI/ML Engineer for **1 year 3 months** (8 months full-time, 7 months part-time), developing **AI agent-based solutions, LLM-powered workflows, Python backend services, and cloud-native applications on AWS** for scalable, production-ready solutions.
- Developed and integrated **AI agents and agentic workflows**, leveraging **AWS cloud services** to deploy, manage, and optimize AI applications for scalability, reliability, and performance.
- Collaborated directly with clients to gather feedback on product releases, translate requirements into technical improvements, and deliver iterative updates aligned with evolving business needs.

PROJECTS:

ASSISTHUB – AI HR ASSISTANT:

Developed an AI-powered HR assistant that enables employees to access company policies and internal information through a conversational interface. Built a multi-agent RAG system for accurate, context-aware responses and implemented agent tool calling to autonomously schedule Google Meet meetings and send email notifications through Google Workspace APIs.

Technologies: AWS Bedrock, FastAPI, React.js, Python, Strands SDK, RAG, Google Workspace APIs, AWS S3, Knowledge Bases, AWS Lambda, Vercel. (*GitHub Repository*)

INTELLIGENT CANDIDATE DISCOVERY AGENT:

Built an AI-powered recruitment agent that automates candidate screening and ranking by analyzing job descriptions, skills, and professional history using Azure AI. Developed an intelligent scoring pipeline that dynamically adjusts candidate rankings based on candidate activity and offer-acceptance likelihood.

Technologies: Python, FastAPI, React.js, Azure AI, Pydantic, Docker, DockerHub. (*GitHub Repository*)

NEWS RANKING USING LLM AGENT:

Developed an LLM-powered news ranking platform that analyzes and ranks articles based on relevance, sentiment, and factuality using Gemini 2.0. Built an AI-driven ranking pipeline with an interactive interface for real-time news exploration.

Technologies: Gemini 2.0, FastAPI, LangChain, Selenium, JavaScript, HTML, CSS. (*GitHub Repository*)

TECHNICAL SKILLS:

Languages: Python, Java, JavaScript, HTML, CSS

Backend & APIs: FastAPI, REST APIs, Pydantic

Agent & LLM Engineering: Retrieval-Augmented Generation (RAG), AI Agents, Multi-Agent Orchestration (Burr), Tool/Function Calling (Strands AgentCore), LangChain, Prompt Engineering, Hallucination Mitigation, Guardrails.

Cloud & DevOps: AWS (Bedrock, S3, Lambda, API Gateway, AgentCore, IAM), Docker, AWS CloudFormation, CI/CD.

Security & Governance: Prompt Injection Defense, PII Redaction, Audit Logging.

LEADERSHIP & ACHIEVEMENTS:

- Runner-Up - Xackathon 2025** and recognized as a **Special Performer** among five college teams.
 - College Cricket Team Captain.**
-
